

Mahendra S H

Frontend & Backend Developer

Hyderabad, India

Professional Summary

- **Frontend & Backend Developer** with **2+ years of professional** experience and **2,000+ hours of freelance & consulting** experience architecting, developing, and maintaining high-performance, scalable web applications.
- **Full-Stack Development**: Proven track record of leading web development initiatives, optimizing performance, designing modular client/server architectures, and building reusable design systems.
- **Domain Expertise**: Background in shipping cargo, logistics, e-commerce, and supply-chain domains, bridging client/server boundaries to deliver user-centric applications from concept to production.
- **AI-Assisted Velocity**: Adept at leveraging Generative AI coding assistants (Copilot, Claude, Antigravity) for efficient debugging, codebase comprehension, and refactoring.

Key Qualifications & Technical Summary

- **Expert TypeScript** & modern JavaScript (ES6+).
- **GraphQL & TanStack Query v5** — queries, mutations, codegen, & server state.
- **Modern UI Libraries** — Tailwind CSS, Radix UI primitives, and shadcn/ui.
- **Complex Data Tables** — advanced filtering and rendering via TanStack Table.
- **Observability & Monitoring** — production experience with Datadog or similar.
- **Shipping Cargo & Logistics** — background in cargo transport, supply chain, and e-commerce domains.
- **Strong Next.js Experience** — App Router, Server Actions, SSR/CSR trade-offs.
- **Full-Stack Boundary** — Java, Spring Boot, Camunda BPM, & MERN Stack (Node, Express, MongoDB).
- **Forms & Validation** — React Hook Form + Zod schema validation.
- **Client State & Redux** — Redux / Redux Toolkit (RTK), Zustand, Recharts, and dnd-kit.
- **Testing Practices** — Vitest, React Testing Library, and Playwright/Cypress.
- **Solid Git Workflow** — robust code-review discipline and clean PR processes.

Work Experience

Infosys — Specialist Programmer (Frontend & Backend Developer) Jul 2024 – Jun 2026
Hyderabad, India (Hybrid)

- **Cargo Readiness (CMA-CGM Project)**: Led frontend modernization and development of microservices backend using Java 21, Spring Boot, and React to automate container readiness workflows.
- Developed a highly responsive React frontend dashboard utilizing **React Query** and **React Table**, reducing verification time and improving decision-making by **35%**.
- Established robust frontend standards, code-review discipline, and Git workflows across a team of developers to ensure high code quality.
- Employed Spring Batch and PostgreSQL optimizations to process **50k+ active bookings** daily and reduced API response times by **20%**.
- Integrated AI coding assistants (GitHub Copilot, Claude, Antigravity) into daily development workflows, accelerating unit test generation, routine boilerplate scaffolding, and legacy code refactoring.

Frontend Consultant & Freelancer Jul 2022 – Present
2,000+ Hours of Freelancing & Consulting

- Built high-performance **MERN Stack** and **Next.js (App Router)** web applications using **TypeScript**, **GraphQL**, and **Tailwind CSS** for logistics and e-commerce clients.
- Configured client state with **Redux / Redux Toolkit** and **Zustand**, server state via **TanStack Query v5**, and visual dashboards with **Recharts**.
- Built secure, dynamic form builders using **React Hook Form** and **Zod**, using **dnd-kit** for seamless drag-and-drop template editors.
- Implemented robust monitoring using **Datadog** and enforced testing coverage with **Vitest**, **React Testing Library**, and **Playwright/Cypress**.

Merav Infotech — Software Engineering Intern Feb 2024 – May 2024
Mysore, India (Remote)

- Spearheaded frontend feature development and designed reusable UI components using React.js and modern JavaScript (ES6+).
- Collaborated with senior engineers to integrate RESTful API endpoints, reducing initial page load times by **15%** via lazy loading and code-splitting.

Key Projects

- E-Commerce Platform (E-Store)** (Next.js, React, Tailwind CSS, Shadcn UI, Prisma ORM, MySQL)
- Built a full-stack e-commerce solution with admin capabilities for managing products, catalog categorization, and processing customer orders.
 - Designed scalable REST APIs to support custom storefronts and seamless integration with payment gateway services.
- SaaS Form Builder Platform** (Next.js, React, Node.js, Express, PostgreSQL)
- Built a full-stack, no-code SaaS form builder allowing users to create and customize dynamic forms via an intuitive drag-and-drop interface.
- Shadcn UI Table Generator** (Astro, React, TypeScript, TanStack Table v8, Shadcn UI)
- Published an open-source developer tool that scaffolds fully-typed TanStack Table v8 columns and Shadcn UI components from JSON or OpenAPI specs.

Technical Skills

- Languages:** JavaScript (ES6+), TypeScript, Java, SQL, HTML/CSS
- Frameworks & Libs:** React.js, Next.js, Redux / Redux Toolkit, Zustand, TanStack Query v5, Spring Boot, Spring Batch, Express.js, Recharts, dnd-kit
- Databases & APIs:** GraphQL, RESTful APIs, PostgreSQL, MySQL, MongoDB, Prisma ORM
- Tools & Testing:** Camunda BPM, Git, GitHub, Datadog, Vitest, React Testing Library, Playwright, Cypress, AWS SQS, Radix UI, shadcn/ui
- AI-Assisted Dev:** GitHub Copilot, Antigravity (Agy), Claude, ChatGPT

Education

National Institute of Engineering (NIE) — B.Tech in Computer Science & Engineering Graduated: May 2024
Grade: 7.3 / 10 CGPA | Relevant Coursework: Data Structures, Database Systems, Software Engineering Mysore, India
