

MAHENDRA S H

Java Cloud Full-Stack Engineer | Java | Spring Boot | React | Microservices | AWS

Hyderabad, India | +91-7892041114 | mahendrashongunti@gmail.com | mahendrash.vercel.app | LinkedIn | GitHub

PROFESSIONAL SUMMARY

- Java Cloud Full-Stack Engineer / Specialist Programmer with 2+ years of enterprise software experience, plus hands-on full-stack development, using Java 21, Spring Boot, React, microservices, REST APIs, PostgreSQL, and AWS.
- Experienced across backend engineering, event-driven systems, asynchronous messaging, Spring Batch processing, workflow automation, cloud infrastructure, database optimization, testing, Docker, and CI/CD quality practices.
- Full-stack experience with React, Next.js, TypeScript, Node.js, responsive dashboards, secure authentication, REST/SOAP integrations, and scalable SaaS applications.

TECHNICAL SKILLS

Languages & Specs: Java 21, JavaScript (ES6+), TypeScript, SQL, OpenAPI, RESTful APIs, HTML5, CSS3

Backend: Spring Boot, Microservices Architecture, Spring Batch, Camunda BPM, Node.js, Express.js, REST APIs, SOAP

Messaging & Cloud: Apache Kafka, AWS EC2, S3, SNS, SQS, API Management

Frontend: React.js, Next.js, Redux, React Query, TanStack Table v8, Tailwind CSS, Shadcn UI

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma ORM, SQL query optimization & indexing

DevOps, QA & Tools: Docker, CI/CD Pipelines, JUnit, Mockito, Git, GitHub, Code Reviews, RCA, Agile/Scrum, Kanban

Security: SSL/TLS, Secure Authentication, Data Privacy

WORK EXPERIENCE

Infosys — Specialist Programmer / Software Developer | Jul 2024 – Jun 2026 | Hyderabad, India

- Architected and engineered enterprise microservices using Java 21, Spring Boot, RESTful APIs, and OpenAPI for event-driven container readiness workflows.
- Integrated Apache Kafka, AWS SNS, AWS SQS, AWS S3, and Camunda BPM for event-driven messaging, queue orchestration, and workflow automation, reducing manual verification overhead by 35%.
- Used Spring Batch to automate high-throughput end-date verification and backend checks, processing 50k+ active bookings daily.
- Developed responsive React dashboards using React Query and TanStack Table, improving operational decision-making efficiency.
- Optimized PostgreSQL SQL queries, reducing REST API response times by 20% and improving system throughput.
- Developed automated unit/integration tests with JUnit and Mockito; performed code reviews and Root Cause Analysis while following CI/CD quality gates and Docker deployment practices.
- Participated across planning, design, implementation, deployment, and maintenance within the enterprise SDLC; worked with secure authentication and SSL/TLS standards.

Independent Software Development — Freelance Full-Stack Developer | Jun 2023 – Jun 2024 | Mysore, India

- Architected, built, and deployed custom web platforms using Java, Node.js, React, and PostgreSQL.
- Developed RESTful APIs, designed relational database schemas, tuned complex SQL queries, and integrated AWS S3 cloud storage.
- Implemented secure user authentication, SSL/TLS data encryption, and Docker-based deployment environments.

Merav Infotech — Software Engineering Intern | Feb 2024 – May 2024 | Mysore, India

- Developed reusable React.js UI components and integrated RESTful APIs.
- Improved page-load performance through lazy loading and code splitting.
- Participated in Agile sprint planning, daily standups, code reviews, and cross-functional delivery.

SELECTED PROJECTS

Cargo Readiness — CMA CGM Project — Java 21, Spring Boot, Microservices, Kafka, AWS SNS/SQS/S3, Camunda, Spring Batch, React, PostgreSQL

- Built event-driven backend workflows for container readiness assessment; automated 50k+ daily booking checks and delivered React operational dashboards.

ProjectX — Generative AI Shirt Studio — Next.js, React, TypeScript, Node.js, AWS S3, Tailwind CSS

- Built a full-stack application for AI-generated shirt designs; implemented asynchronous polling/WebSocket workflows and optimized AWS S3 asset storage.

SaaS Form Builder Platform — Next.js, React, Node.js, Express, PostgreSQL, AWS

- Built a no-code form builder with drag-and-drop creation, secure REST APIs, analytics tracking, and embeddable scripts used across 20+ client sites.

E-Commerce Platform — Next.js, React, Tailwind CSS, Shadcn UI, Prisma ORM, MySQL, AWS S3

- Built a full-stack e-commerce platform with admin product/catalog management, customer order processing, scalable REST APIs, and AWS S3 media storage.

SpendOptima — Next.js, React, Tailwind CSS, Recharts, TypeScript

- Built a responsive personal finance and expense-optimization dashboard with interactive budget analytics and SEO-focused frontend templates.

Shadcn UI Form & Table Generators — Open Source — Astro, React, TypeScript, TanStack Table v8, Shadcn UI, Zod

- Built schema generators from JSON/OpenAPI specifications that scaffold typed form schemas and table components, reducing frontend boilerplate setup time by 80%.

EDUCATION

National Institute of Engineering (NIE) — B.Tech in Computer Science & Engineering | Graduated May 2024 | Mysore, India

CGPA: 7.3 / 10 | Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, DBMS, Object-Oriented Design
